Smart WiFi Indoor Camera UltraHD, Pan & Tilt, Autotracking

A young child in a grey long-sleeved shirt and pants is jumping on a bed. A red rectangular box with corner brackets is overlaid on the child, indicating motion tracking. The background shows a window with white curtains and a wooden shelf with a small white camera.

**Nothing can go unnoticed
by this surveillance device
because it is equipped with
autotracking function, and
the detected subject will be
tracked thanks to it's
motion sensor.**

Motion detection with 10m PIR

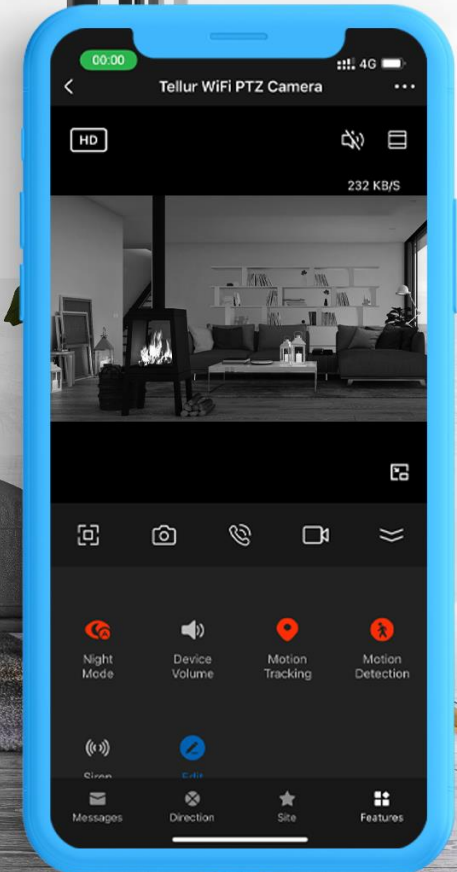

Auto tracking

You can control the Pan & Tilt functions remotely and see everything that's happening in your house, from everywhere, by simply accessing Tellur Smart app from your smartphone.

**For an extra layer of security,
the camera records in Ultra HD
resolution and enters night vision
mode automatically, when the
sensor detects a decrease in
light's intensity.**
